DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 47-68 and 70-72, drawn to a process for destabilizing a viral quasi-species distribution without inducing resistance to therapeutic agents by replication of nucleic acid of viruses present in the quasi species-distribution by means of a defective replication system and an agent for the performance of the process according to claim 47, classified in class 435, subclass 5.

Group II, claim(s) 69, drawn to a method for the treatment or prophylaxis of diseases caused by virus comprising inducing a rate of misincorporation during viral replication higher than the rate of misincorporation of the wild-type virus, classified in class 435, subclass 173.1.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I, claims 47-68 and 70-72 are drawn to a process for destabilizing a viral quasi-species distribution without inducing resistance to

therapeutic agents by replicating nucleic acid of viruses present in the quasi-species and Group II, claim 69 is drawn to a method for the treatment or prophylaxis of diseases caused by a virus comprising inducing a rate of misincorporation during viral replication higher than the rate of misincorporation of the wild-type virus. Thus, based upon the method steps as discussed above, they lack the same or corresponding special technical features.

3. A telephone call was made to Mr. Edward R. Freedman on 7/29/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is (703) 305-7112. The examiner can normally be reached on Monday-Friday from 8:00 AM-4:30 PM.

Art Unit: 1637

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached at (703) 308-1119 on Monday-Friday from 10:00 AM-6:00 PM.

Any inquiries of a general nature or relating to the status of this application should be directed to the Chemical/Matrix receptionist whose telephone number is (703) 308-0196.

6. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Art Unit 1637 via the PTO Fax Center located in Crystal Mall 1 using (703) 305-3014 or 308-4242. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989).
